## Objective

---

Seeking to lead a small group of SRE/DevOps engineers to reduce toil, and enable dev teams

## Experience

---

### Cvent

**Lead Site Reliability Engineer:** March 2024 - Present Tysons, Virginia

- Leading AWS CDK v2 upgrades and delivering them on time leveraging Big Picture
- Migrating Acquisitions - Lambda/S3 SME
- Companywide S3 SME - Cost Optimization, Object Recovery, Best Practices
- Lead Project Planning and Standups for team of 8 SREs

**Senior Site Reliability Engineer:** August 2019 - March 2024 Atlanta, Georgia

- Migrated Over 60TB of s3 Data using Cross Region Replication for disaster recovery
- Leveraged AWS CDK to migrate over 60 nodeJS micro-services between AWS accounts
- Building and maintaining a CircleCI Orb for repeatable deployment pipelines
- Support multiple development teams through on-call rotation
- Lead Production outages as a member of the Incident Commander on-call rotation

### Capital One

McLean, Virginia

**TDP Cyber Security Engineer:** July 2017 – July 2019

- Automated AWS Infrastructure
- Containerized applications using Docker
- Developed security tools for Red and Blue teams

## Projects

---

**Account Migration: Moving an Acquisition Into A Cvent Standard AWS Account, Cvent**

- Creating IaC and Improving Security Standards on Existing Infra
- Deploying ECS/Lambda/Elasticsearch/s3 and other large Components
- Validating and Solving Issues During Testing and Cutover Phase

**OpenVPN: Connecting Cloud-Based CICD Pipeline to Internal Infra, Cvent**

- Implemented OpenVPN Solution for CircleCI to reach internal networks
- Wrote repeatable code via a CircleCI Orb - Defined once and used everywhere

## Skills

---

**AWS CDK - Typescript | Docker | AWS | Python | Cloudformation | CircleCI**

## Education

---

**Georgia Institute of Technology, May 2017**

Atlanta, Georgia

- B.S. in Computer Engineering

## Certifications

---

**AWS Certified Solutions Architect Associate – May 2018 – May 2020**
